

# USER MANUAL

VERSION V1.0 November 2010

## ***EVO-TP4*** ***Hardware System***

The information contained in this document is subject to change without notice. We make no warranty of any kind with regard to this material, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. We shall not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance, or use of this material.

This document contains proprietary information that is protected by copyright. All rights are reserved. No part of this document may be photocopied, reproduced or translated to another language without the prior written consent of the manufacturer.

## TRADEMARK

Intel®, Pentium® and MMX are registered trademarks of Intel® Corporation. Microsoft® and Windows® are registered trademarks of Microsoft Corporation. Other trademarks mentioned herein are the property of their respective owners.

## Safety

### IMPORTANT SAFETY INSTRUCTIONS

1. To disconnect the machine from the electrical power supply, turn off the power switch and remove the power cord plug from the wall socket. The wall socket must be easily accessible and in close proximity to the machine.
2. Read these instructions carefully. Save these instructions for future reference.
3. Follow all warnings and instructions marked on the product.
4. Do not use this product near water.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register or in a built-in installation unless proper ventilation is provided.
7. This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where persons will walk on the cord.
9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

This device complies with the requirements of the EEC directive 2004/108/EC with regard to “Electromagnetic compatibility” and 2006/95/EC “Low Voltage Directive”.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

## CAUTION ON LITHIUM BATTERIES

There is a danger of explosion if the battery is replaced incorrectly. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer’s instructions.

### Battery Caution

Risk of explosion if battery is replaced by an incorrectly type. Dispose of used battery according to the local disposal instructions.

### Safety Caution

Note: To comply with IEC60950-1 Clause 2.5 (limited power sources, L.P.S) related legislation, peripherals shall be 4.7.3.2 “Materials for fire enclosure” compliant.

#### 4.7.3.2 Materials for fire enclosures

For MOVABLE EQUIPMENT having a total mass not exceeding 18kg.the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of V-1 CLASS MATERIAL or shall pass the test of Clause A.2.

For MOVABLE EQUIPMENT having a total mass exceeding 18kg and for all STATIONARY EQUIPMENT, the material of a FIRE ENCLOSURE, in the thinnest significant wall thickness used, shall be of 5VB CLASS MATERIAL or shall pass the test of Clause A.1

## LEGISLATION AND WEEE SYMBOL

2002/96/EC Waste Electrical and Electronic Equipment Directive on the treatment, collection, recycling and disposal of electric and electronic devices and their components.

The crossed dust bin symbol on the device means that it should not be disposed of with other household wastes at the end of its working life. Instead, the device should be taken to the waste collection centers for activation of the treatment, collection, recycling and disposal procedure.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract.

This product should not be mixed with other commercial wastes for disposal.

# Revision History

Changes to the original user manual are listed below:

Revision	Description	Date

# 1. Packing List

## 1-1. Standard Accessories

- a. System (with stand)
- b. Driver bank
- c. Power adapter
- d. Power cord
- e. RJ45-DB9 cable (x3)

## 1-2. Optional Accessories

- a. MSR Module
- b. VFD Module (with RJ-45 cable)
- c. Second Display (with VGA cable)
- d. Wall Mount Kit
- e. Cable Cover

# 2. System View

## 2-1. Front & Side View

Item No.	Description
1	Touch screen
2	MSR module ( <i>optional</i> )
3	Rugged footprint
4	Ventilation
5	HDD door

## 2-2. Rear View with stand

Item No.	Description
6	VFD dummy cover
7	MSR dummy cover

## 2-3. I/O Ports View

Item No.	Description
a	Power Button
b	2nd VGA
c	Parallel
d	USB x 4
e	COM 1, 2, 3, 4 (from right to left)
f	Line-out
g	Mic-in
h	Cash Drawer
i	LAN
j	Power Switch
k	DC-IN

## 2-4. System Dimension

# 3. System Assembly & Disassembly

## 3-1. Stand Disassembly

1. Loosen the thumb screw (x1) and slide the stand towards the IO panel to release it from the system.
2. Reverse the steps above to attach stand to the system.

## 3-2. Power Adapter Replacement

Power adapter is secured into the system stand by a holding bracket and screws. To attach power adapter, please follow the steps below.

1. Lay the PC on its back to access the bottom of the system stand.
2. Place the adapter into the cavity (shown in the picture) and secure it with the holding bracket and screws (x2).
3. Route the cable as shown in the picture.
4. Connect the cable to the DC-IN port on system IO panel.

## 3-3. HDD Replacement

For replacement, please remove the current HDD first.

### Remove the HDD from the System

1. Power the system down.
2. Remove the screw(x1) from the HDD door.
3. Open the HDD door.
4. While pinching the HDD bracket tabs pull the HDD from the system. For easier removal pull the plastic puller (see picture) at the same time.

### Disassemble HDD

5. To release the HDD from the bracket gently pull it open until the four pins are removed.

6. To install a new HDD. Attach the HDD to the bracket until it clicks in place. Make sure to press the edges of the drive not the center to avoid damaging the drive.

7. Finally slide the HDD into the slot till it clicks.

## 3-4. Open the System

1. Place the system face down. Making sure not to scratch the screen.
2. Remove the screws (x4) on system rear cover to open the system.

***note: If the system is equipped with a MSR. The MSR must be removed first.(refer to Chapter 4-1 and reverse the steps to remove the MSR)***

## 3-5. RAM Replacement

1. Follow the steps in Chapter 3-4 to open the system.
2. The RAM is located on the right side of the system (see picture).

### Installing a RAM module

3. Slide the memory module into the memory slot and press down until it locks in place.

### Removing a RAM module

3. To remove the module pull the ejector clips out of the side of the module.
4. Slide the memory out of the slot.

# 4. Peripheral Installation

## 4-1. MSR Installation

MSR module can be installed to either side of the system. Choose one side and follow the steps below.

1. Remove the screws (x2) to release the MSR dummy cover.

2. Connect MSR cable to the connector on system side.
3. Insert MSR module in place and fasten the screws (x2) on the back to secure the module.

## 4-2. VFD Installation

1. Follow steps in Chapter 3-1 to disassemble the system stand.
2. Attach the VFD module to system by fastening the screws (x2).
3. Route the cable through cable mangement on the system stand.
4. Connect the RJ-45 cable to COM 4 on the systems IO panel. Make sure the system is powered off.

## 4-3. Second Display Installation

1. Follow steps in Chapter 3-1 to disassemble the system stand.
2. Connect one end of the VGA cable to 2nd Display. Route the cable through cable mangement on the system stand.
3. Attach the 2nd Display to system by fastening the screws (x2).
4. Connect the other end of the VGA cable to 2nd VGA port on system IO panel.

## 4-4. Wall Mount Kit Installation

The Wall Mount Kit includes a wall plate, a metal bracket, and one screw. (refer to Chapter 1-2 item e) Please follow the steps below for installation.

1. Secure the wall plate to the wall by fastening screws (x4).

2. Attach the metal bracket to the back side of the sytem by fastening the screw (x1) as picture shown.

3. Align the large end of the teardrop mounting holes (x4) on the wall plate with the screws (x4) on the systems rear cover. Slide the wall plate until the screws are even with the narrow end.

4. Fasten the screw (x1) through the metal bracket to secure the wall mount kit.

## 4-5. Cable Cover Installation

There are two different cable covers. These can be utilized separately or together. When both are needed, please take care that they are installed in the correct order.

1. Slide the covers on the IO panel.  
if using both the larger cover need to be installed before the smaller one.
2. Fasten the screws (x3, two for the larger one and one for the smaller one) to secure the covers.

# 4-6. Cash Drawer Installation

You can install a cash drawer through the cash drawer port. Please verify the pin assignment before installation.

## Cash Drawer Pin Assignment

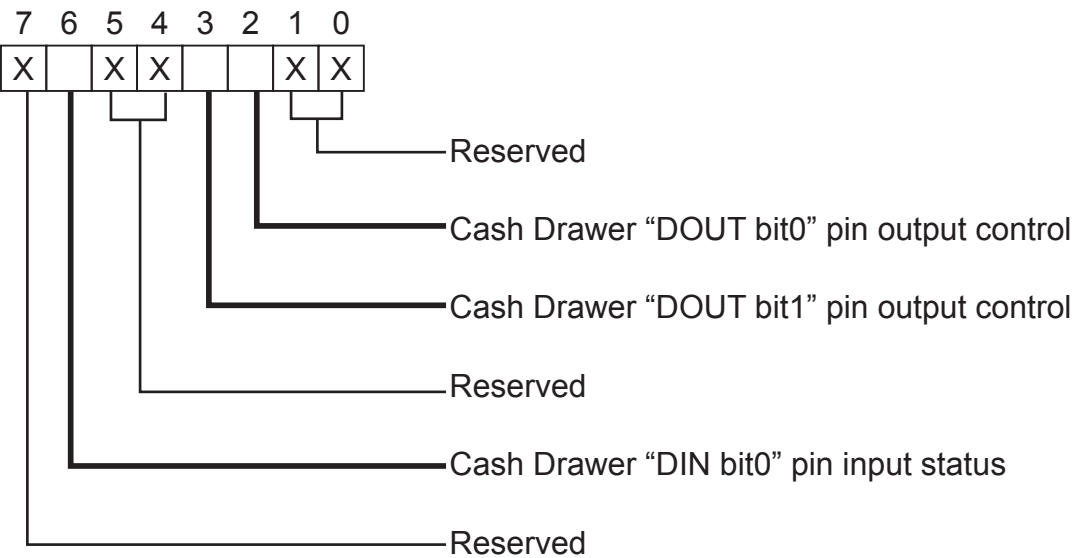

Pin	Signal
1	GND
2	DOUT bit0
3	DIN bit0
4	12V / 19V
5	DOUT bit1
6	GND

## Cash Drawer Controller Register

The Cash Drawer Controller use one I/O addresses to control the Cash Drawer.

**Register Location:** 48Ch  
**Attribute:** Read / Write  
**Size:** 8bit

BIT	BIT7	BIT6	BIT5	BIT4	BIT3	BIT2	BIT1	BIT0
Attribute	Reserved	Read	Reserved		Write		Reserved	

Bit 7: Reserved  
 Bit 6: Cash Drawer "DIN bit0" pin input status.  
       = 1: the Cash Drawer closed or no Cash Drawer  
       = 0: the Cash Drawer opened  
 Bit 5: Reserved  
 Bit 4: Reserved  
 Bit 3: Cash Drawer "DOOUT bit1" pin output control.  
       = 1: Opening the Cash Drawer  
       = 0: Allow close the Cash Drawer  
 Bit 2: Cash Drawer "DOOUT bit0" pin output control.  
       = 1: Opening the Cash Drawer  
       = 0: Allow close the Cash Drawer  
 Bit 1: Reserved  
 Bit 0: Reserved

Note: Please follow the Cash Drawer control signal design to control the Cash Drawer.

## Cash Drawer Control Command Example

Use Debug.EXE program under DOS or Windows98

Command	Cash Drawer
O 48C 04	Opening
O 48C 00	Allow to close
► Set the I/O address 48Ch bit2 =1 for opening Cash Drawer by "DOOUT bit0" pin control. ► Set the I/O address 48Ch bit2 = 0 for allow close Cash Drawer.	

Command	Cash Drawer
I 48C	Check status
► The I/O address 48Ch bit6 =1 mean the Cash Drawer is opened or not exist. ► The I/O address 48Ch bit6 =0 mean the Cash Drawer is closed.	

# 5. Specifications

Motherboard	C48	B68
CPU Support	Intel Pineview D525 1.8G L2 1M, duo core 13W	Intel Atom N270 processor 1.6GHz L2 512K
Chipset	CPU with Graphic built-in + ICH 8M	Intel 945GSE Express + ICH7M FSB 533MHz
System Memory	2 x DDR3 DIMM up to 4GB FSB800Mhz	2 x DDRII SO-DIMM slot, up to 2GB
Graphic Memory	Shared system memory up to 256MB	Shared system memory up to 224MB
LCD Touch Panel		
LCD Size	15" TFT LCD	
Brightness	250nits	
Maximal Resolution	1024 x 768	
Touch Screen Type	Resistive	
Tilt Angle	0° ~ 90°	
Storage		
HDD	One 2.5" SATA HDD bay	
Flash Memory	SATA SSD flash card (optional)	
Expansion		
PCI-E Socket	1	
External I/O Ports		
USB	4 ports (V2.0)	
Serial / COM	4 x RJ45 COM (COM1/COM2 standard RS-232 without power, COM3 /COM4 powered COM with power enable /disable by BIOS setting and +5V/+12V by MB setting. COM3 default +5V/ COM4 default +12V)	
Parallel	1	
LAN (10 /100 / 1000)	1 x RJ45	
DC Jack	1	
2nd VGA	1 (Female)	
Cash Drawer Port	1 x RJ 11 (12V /24V)	
Audio Jack	1 x Line-out, 1 x Mic-in	
Audio		
Built in Speaker	2 x 2W speakers (optional)	
Power		
Power Adapter	19V/90W	
Control / Indicator		
Power Button	1	
Indicator LED	1	
Peripheral		
MSR	3 Tracks MSR ( PS/2 )	
Bio Reader	1 (USB)	
Second Display	(optional) 8.4" / 15" 2nd display without touch	
Customer Display	Flush mount VFD display 2 x 20 characters (COM)	
Communication		
Wireless LAN	802.11 a/b/g wireless LAN card & antenna	
Environment		
EMC & Safety	FCC, Class A, CE, LVD	
Operating Temperature	5°C ~ 35°C (41°F ~ 95°F)	
Storage Temperature	-20°C ~ 55°C (-4°F ~ 140°F)	
Operating Humidity	20% ~ 80% RH non condensing	
Storage Humidity	20% ~ 85% RH non condensing	
Dimension (W x D x H)	LCD 90 degree : 361 x 248 x 337 mm	
Weight (N.W./G.W.)	7kgs / 8kgs	
Mounting	100mm x100mm VESA mounting holes for Panel PC type	
OS Support	Windows® XP Professional, Windows Embedded POSReady 2009, Windows XP Embedded, Windows XP Professional for Embedded, WinCE, Vista, Windows 7, Linux	

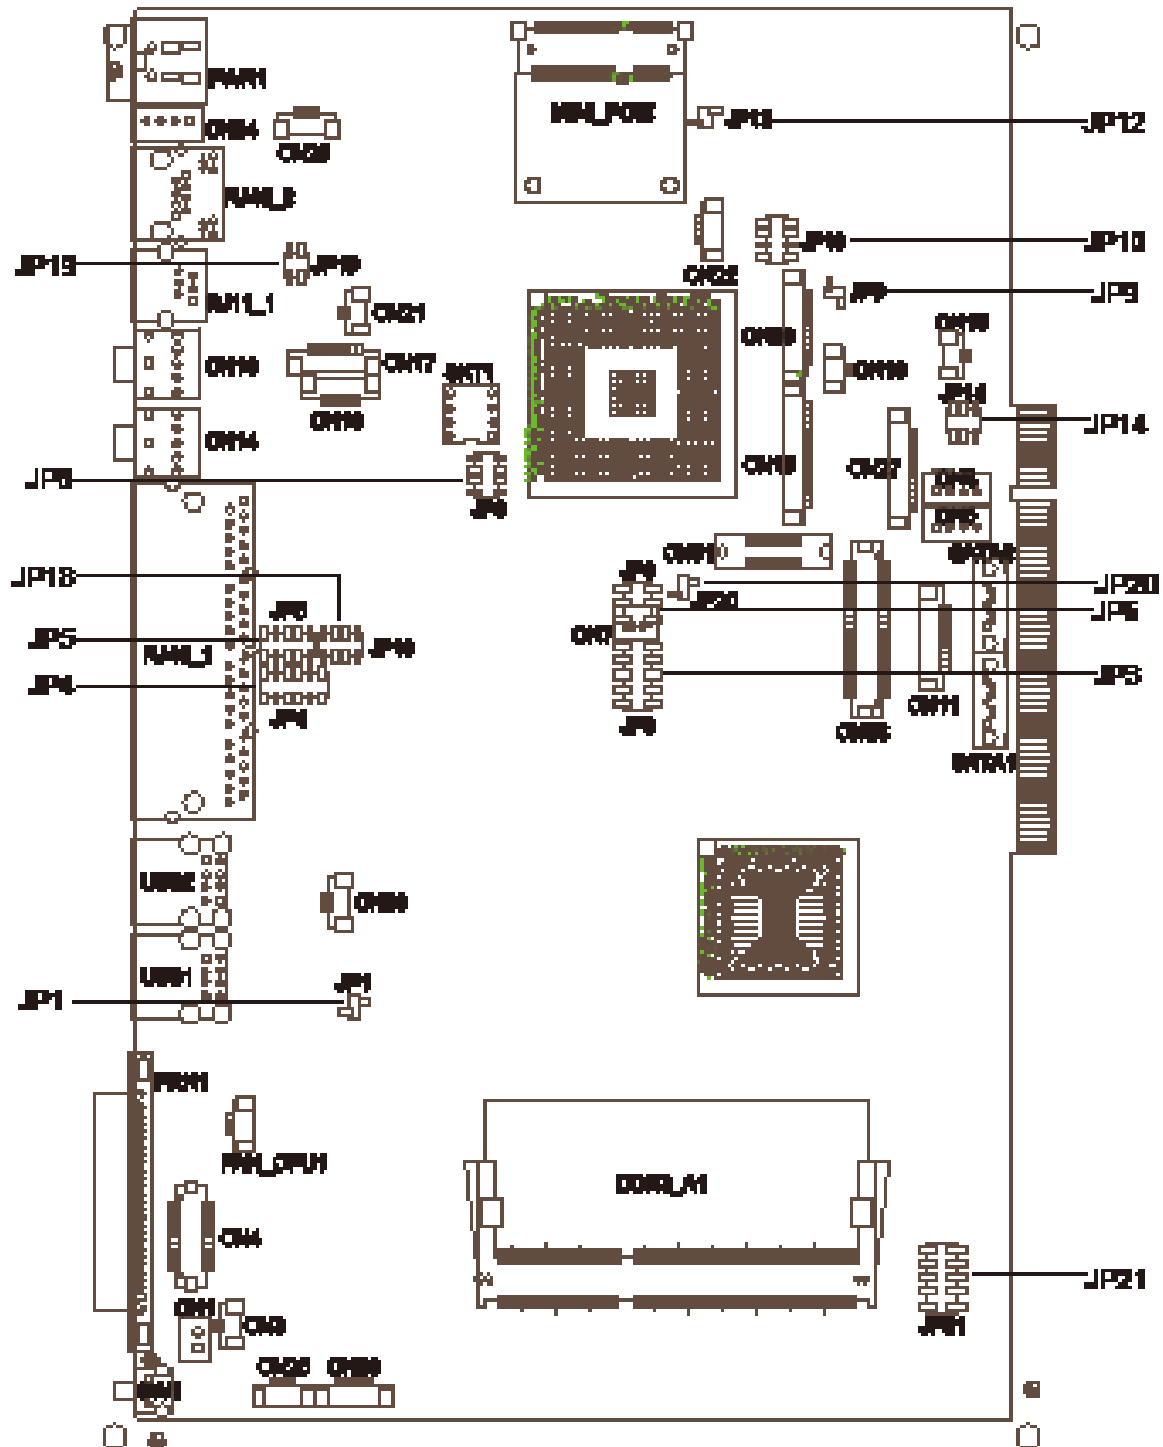

\* This specification is subject to change without prior notice.

## CMOS Operation Mode

### CMOS Reset

To clear the CMOS,

1. Remove the power cable from the system.
2. Open the system, and set the 'CMOS Operation jumper' from 'CMOS Normal' to 'CMOS Reset'. (refer to the jumper shown below)
3. Connect the power cable to the system, and **power on the system**:  
in ATX mode: press the power button and it will fail power on  
in AT mode: turn on system power
4. Remove the power cable from the system.
5. Return the "CMOS Operation mode" jumper setting from "CMOS Reset" to "CMOS normal".
6. Connect the power cable and power on the system.

## COM3 & COM4 Power Setting

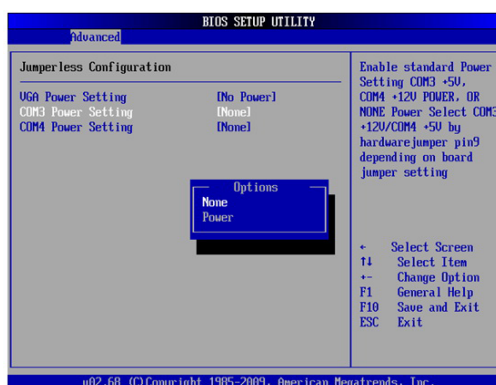

For C48, COM3/COM4 power adjustment must be made by BIOS/Utility and Jumper. Since COM3/COM4 default is "None" meaning no power, power must be on through BIOS prior to physical jumper change.

### BIOS/Utility setup

1. Press <DEL> key to enter BIOS SETUP UTILITY when system boot up.
2. Find tab "Advanced".
3. Select "Power Configuration COM/VGA Ports" and press <Enter> to go to sub screen.

4. To switch on the power, select "Power". Please save the change before exiting BIOS so as to go for physical jumper adjustment.

### Jumper Setup

▲ = Manufacturer Default Setting

## LCD ID Setting

Several configurations are applied to different sizes of panel. Please refer to the followings to complete relevant settings.

### • Jumper Setup

Resolution	LVDS		Output Interface	JP8
	Bits	Channel		
800 x 600	24	Single	1st: LCD Panel 2nd: VGA port	1 3 5 7 2 4 6 8
1024 x 768	24	Single		1 3 5 7 2 4 6 8
1366 x 768	24	Single		1 3 5 7 2 4 6 8
800 x 600	18	Single		1 3 5 7 2 4 6 8
*800 x 600	18	Single		1 3 5 7 2 4 6 8
1024 x 768	18	Single		1 3 5 7 2 4 6 8

**\*remark:** specialized for Sharp 12.1" LQ121S1LG41/LQ121S1LG42 panel.

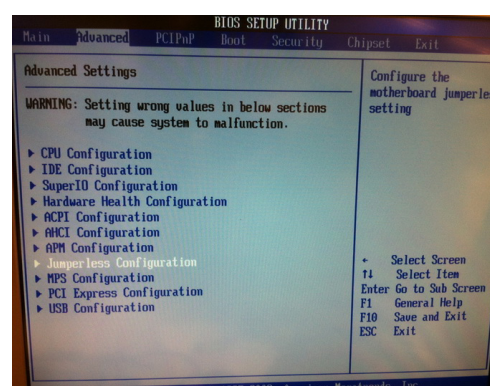

1 Jumper open      1 Jumper short  
2 Jumper open      2 Jumper short

### • 2nd VGA Power Setting

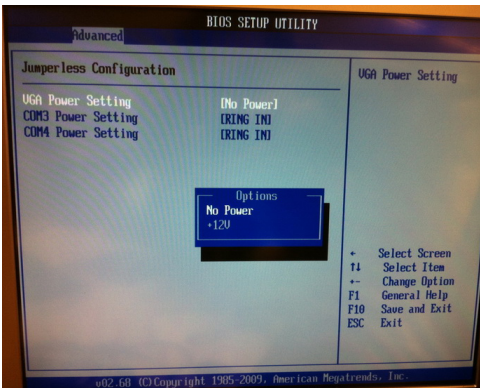

VGA port power must be on through BIOS/Utility for default is "No Power".

### BIOS/Utility setup

1. Press <DEL> key to enter BIOS SETUP UTILITY when system boot up.
2. Find tab "Advanced".
3. Select "Jumperless Configuration" and press <Enter> to go to sub screen.

- To switch on the power, select "+12V". Please save the change before exiting BIOS to avoid data lost.

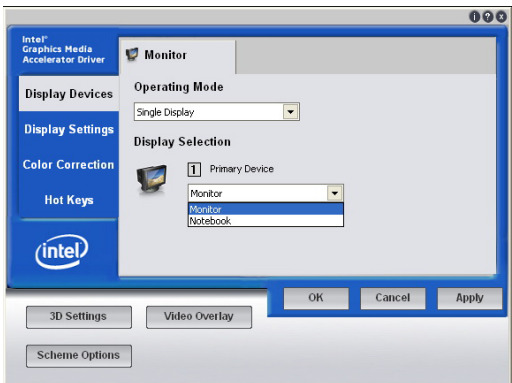

## • Intel Graphics Driver Setting

- Right click Desktop. Find "Graphics Properties" and enter the manu.

- Make sure the Display Device is same as follows.

No.	Output Interface	Connector & Jumper	Intel Graphics Driver Device Name
1st	LCD Panel	CN26	Notebook
2nd	VGA Port	JP3/6	Monitor

## 6-2. For B68 Motherboard

### 6-2-1. Motherboard Layout

# Appendix: Drivers Installation

The shipping package includes a Driver CD in which you can find every individual driver and utility that enables you to install the drivers on the system.

Please insert the Driver CD into the drive and double click on the “index.htm” to select the models. You can refer to the drivers installation guide for each driver in the “Driver/Manual List”.
