POSX

ION WIRELESS BARCODE SCANNER

Quick Start Guide

POS-X Inc. tel: 360-738-8433
www.pos-x.com support@pos-x.com

About your POS-X ION Wireless scanner

The POS-X ION Linear Wireless scanner integrates one-on-one wireless data communication protocol. The scanner is already paired with the USB receiver. Just plug-in the USB receiver and start scanning. If the scanner is connected, the barcode is decoded and transmitted to the remote host without any delay. If the scanner is not connected or out of range, the data is lost (status: 2 beeps/4 beeps).

Note: New batteries should be fully charged before their first use

Wake-up your POS-X wireless scanner

Press and release the trigger on your scanner to activate it. Your scanner is ready to work when orange LED comes on

Connect USB receiver to a host computer

The device should be quickly recognized by the host computer without any software/driver installation. The receiver will double flash red in 10 seconds to inform the initialization is completed.

Recharging the battery

The Red LED comes on when the battery level is low, please recharge the scanner immediately. When the scanner is charging, the LED is green (solid). A full recharge (from completely drained battery) takes approximately 4 hours. When the scanner is fully charged, the green LED will go off.

How to pair (re-pair) you scanner and receiver?

Step 1: Plug-in the USB receiver into the scanner.

Step 2: Pull the trigger button on the scanner.

Step 3: 1 beep from scanner and 1 blink from the USB receiver will mean the devices are successfully paired.

Scanner LED indicator

Status / indicator	Beeper	Blue LED	Green LED	Red LED
Good Scan	1 beep	1 blink		
Transmission failure	4 beeps			
Low battery				On
Recharge			On	
Operation mode		On		
Sleeping	None	None	None	Noe

How do you program your ION Wireless scanner?

1.Scan "Start Configuration"

2.Scan all necessary parameters that meet your application.

3.Scan "End Configuration" to save the changes.

Resetting The Standard Product Defaults

If you aren't sure what programming options are set in your scanner, or you've changed some options and want the factory settings restored, scan the bar code below.

Default setting of wireless scanner

- Buzzer : High
 - Vibrator: Disable
 - Memory mode: Disable
 - Power saving (sleep mode): 10min
- The default values can be modified by scanning the following options.

Note: Please scan the following barcode directly with your USB receiver on. No need to scan start and end configuration barcodes.
