

KEYBOARD MODE FOR iSAPPOS 4 /5

No API integration needed to scan 1D / 2D barcodes

What's New?

The latest keyboard mode for iSAPPOS 4 / 5 Scanner Jacket for iPhone is ready to launch! Follow the simple setup below and **gather your data in no time!**

How to set it up?

Step 1: Switch from Standard Mode to Keyboard Mode

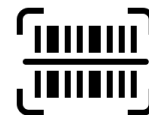

Pair your iPhone with the Scanner Jacket via Bluetooth. Scan this QR code to switch to keyboard mode.

(Once keyboard mode is activated, the virtual keyboard of your iPhone will disappear.)

Step 2: Scan Any 1D / 2D Barcode

Scan any 1D / 2D barcode. The barcode will be automatically decoded into your app. The scan engine supports Linear / 2D Stacked / 2D Matrix Barcodes and Postal Codes.

Step 3: Gather And Transfer Your Data

Gather and collect data for your business. The Scanner Jacket serves as your best enterprise-grade business companion!
